BYOD Chromebook Setup

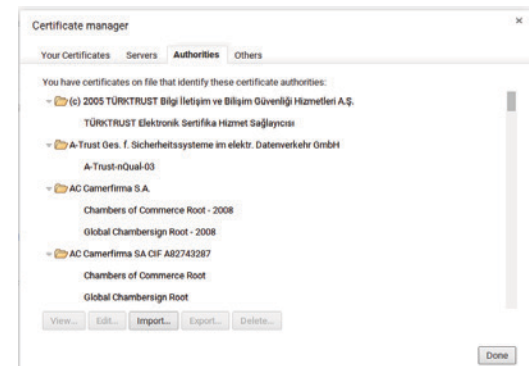

Connecting to the Wi-Fi

1. Connect to the ‘**PCTI-One**’ Wi-Fi network.
2. Make sure you have the following settings selected:
 - EAP method: **PEAP**
 - Phase 2 Authentication: **Automatic**
 - Server CA certificate: **Do not check**
 - Identity: **ID Number**
 - Password: **Your current PCTI password**
3. Click ‘**Connect**’ and press ‘**Continue**’ on the next screen
4. Click ‘**Accept and Start**’ on the ‘**PCTI Device Registration**’ screen.
5. Under the “**Device Registration**” screen type in any desired name for your Chromebook. The Description is optional.
6. Click “**Continue**”

Installing the Certificate

1. Download the Certificate from: www.pcti.tec.nj.us/byod
2. Open the Chrome browser, type “**chrome://settings/certificates**” into the address bar and press Enter
3. Inside the **Certificate Manager** go to the **Authorities** tab and click on the "Import..." button at the bottom of the manager
4. Select **Google Drive** or **Downloads** to find the certificate file.

Base64-encoded ASCII, single certificate
Base64-encoded ASCII, certificate chain
DER-encoded binary, single certificate
PKCS #7, single certificate
PKCS #7, certificate chain
All files
All files

IMPORTANT: If the file does not show up in either list change the file type filter at the bottom of the page to "All files" and search again.

5. Select the certificate file and click on the **Open** button.
6. Check the options to "**Trust this certificate for identifying websites**", "**Trust this certificate for identifying email users**" and "**Trust this certificate for identifying software makers**".
7. Click the **OK** button.
