

**Algebra I Applications**

**Course # 0302**

**Credits 5**

**2017**

## **Applications of Algebra 1 Curriculum Overview**

### **PCTI Applications of Algebra 1 Curriculum (Aligned to PARCC and the NJ student learning standards for mathematics)**

The Application of Mathematics curriculum is aligned with the Algebra One curriculum to provide a life application perspective. Real world situations and experiences are brought into the classroom through structured learning experiences. The study of mathematics also leads to the ability to think logically and solve problems. The course develops thought patterns and mental discipline appropriate to life in a technological age.

This course is designed to develop skills of mathematics, problem solving strategies, and methods of solutions applicable to real life situations. Deductive reasoning, hands-on experience, application and communication of mathematics, college preparatory, and technical field-oriented skills enhance basic math instruction. The students will develop the skill in mathematics necessary to succeed at the college level, in a skilled job area, and pass the PARCC exam.

Topics include properties of real numbers, solutions of linear equations and inequalities, quadratic equations, polynomials, problem solving, functions, graphing, data analysis, and statistics.

Unit 1	Topic	STUDENT LEARNING OBJECTIVES	Suggested Days	NJ Math Standard	Textbook Reference		Key Vocabulary (from textbooks)	Khan Academy Links
					Larson (H and CP)	Holt (C and Apps 1)		
Start		Review summer packet	10					
1.01	I.) Expressions, Equations & Inequalities	1.) Apply order of operations	2	<a href="#">A.SSE.A.01.b</a>	1.2	n/a	order of operations	<a href="https://www.khanacademy.org/math/pre-algebra/pre-algebra-arith-prop/pre-algebra-order-of-operations/v/introduction-to-order-of-operations">https://www.khanacademy.org/math/pre-algebra/pre-algebra-arith-prop/pre-algebra-order-of-operations/v/introduction-to-order-of-operations</a>
1.02	I.) Expressions, Equations & Inequalities	2.) Evaluate expressions (define/compare/contrast rational and irrational numbers)	2	<a href="#">F.IF.A.02</a> <a href="#">N.RN.B.03</a>	1.1	1.1	variable, constant, numerical expression, algebraic expression, evaluate, power, base, exponent	<a href="https://www.khanacademy.org/math/algebra-home/alg-intro-to-algebra/alg-substitution/v/evaluating-expressions-in-two-variables">https://www.khanacademy.org/math/algebra-home/alg-intro-to-algebra/alg-substitution/v/evaluating-expressions-in-two-variables</a>
1.03	I.) Expressions, Equations & Inequalities	3.) Solve 2 step equations and verify the solution(s) with substitution. (Include decimal and fraction solving without a calculator)	2	<a href="#">A.REI.B.03</a> <a href="#">A.CED.A.01</a>	2.3	1.4	like terms, input, output,	<a href="https://www.khanacademy.org/math/algebra/one-variable-linear-equations/alg1-two-steps-equations-intro/v/why-we-do-the-same-thing-to-both-sides-two-step-equations">https://www.khanacademy.org/math/algebra/one-variable-linear-equations/alg1-two-steps-equations-intro/v/why-we-do-the-same-thing-to-both-sides-two-step-equations</a>
1.04	I.) Expressions, Equations & Inequalities	4.) Solve multi-step equations and justify each step with properties of equality (Review distributive property in do now)	3	<a href="#">A.REI.B.03</a> <a href="#">A.REI.A.01</a> <a href="#">A.CED.A.01</a>	2.4	1.4	distributive property, reciprocal	<a href="https://www.khanacademy.org/math/pre-algebra/pre-algebra-arith-prop/pre-algebra-distributive-property/v/the-distributive-property">https://www.khanacademy.org/math/pre-algebra/pre-algebra-arith-prop/pre-algebra-distributive-property/v/the-distributive-property</a>
1.05	I.) Expressions, Equations & Inequalities	5.) Create and solve equations with variables on both sides	2	<a href="#">A.CED.A.01</a>	2.5	1.5	identity	<a href="https://www.khanacademy.org/math/algebra/one-variable-linear-equations/alg1-variables-on-both-sides/v/why-we-do-the-same-thing-to-both-sides-multi-step-equations">https://www.khanacademy.org/math/algebra/one-variable-linear-equations/alg1-variables-on-both-sides/v/why-we-do-the-same-thing-to-both-sides-multi-step-equations</a>
1.06	I.) Expressions, Equations &	6.) Write and solve proportions. Write and simplify ratios.	2	<a href="#">N.Q.A.01</a> <a href="#">F.LE.A.01.b</a>	2.6	1.8, 1.9	ratio, proportion, simplest form	<a href="https://www.khanacademy.org/math/pre-algebra/pre-algebra-ratios-rates/pre-algebra-write-and-solve-proportions/v/find-an-unknown-in-a-proportion">https://www.khanacademy.org/math/pre-algebra/pre-algebra-ratios-rates/pre-algebra-write-and-solve-proportions/v/find-an-unknown-in-a-proportion</a>

	Inequalities							<a href="https://www.khanacademy.org/math/pre-algebra/pre-algebra-ratios-rates/pre-algebra-ratios-intro/v/ratios-intro">https://www.khanacademy.org/math/pre-algebra/pre-algebra-ratios-rates/pre-algebra-ratios-intro/v/ratios-intro</a> <a href="https://www.khanacademy.org/math/pre-algebra/pre-algebra-ratios-rates/pre-algebra-rates/v/practice-computing-and-comparing-rates">https://www.khanacademy.org/math/pre-algebra/pre-algebra-ratios-rates/pre-algebra-rates/v/practice-computing-and-comparing-rates</a>
1.07	I.) Expressions, Equations & Inequalities	7.) Create, solve and graph inequalities in one variable	3	<a href="#">A.REI.B.03</a> <a href="#">A.CED.A.01</a>	5.1, 5.2, 5.3	2.4, 2.5	graph of an inequality, equivalent inequality, solution of an inequality	<a href="https://www.khanacademy.org/math/algebra/one-variable-linear-inequalities">https://www.khanacademy.org/math/algebra/one-variable-linear-inequalities</a>
1.08	II.) Polynomial Operations	1.) Add & subtract polynomials and classify by degree & number of terms (Include perimeter problems)	3	<a href="#">A.APR.A.01</a>	8.1	6.4	monomial, degree, polynomial, leading coefficient, binomial, trinomial	<a href="https://www.khanacademy.org/math/algebra/introduction-to-polynomial-expressions/adding-and-subtracting-polynomials/v/adding-and-subtracting-polynomials-1">https://www.khanacademy.org/math/algebra/introduction-to-polynomial-expressions/adding-and-subtracting-polynomials/v/adding-and-subtracting-polynomials-1</a> <a href="https://www.khanacademy.org/math/algebra/introduction-to-polynomial-expressions/introduction-to-polynomials/v/terms-coefficients-and-exponents-in-a-polynomial">https://www.khanacademy.org/math/algebra/introduction-to-polynomial-expressions/introduction-to-polynomials/v/terms-coefficients-and-exponents-in-a-polynomial</a>
1.09	II.) Polynomial Operations	2.) Multiply powers by applying the product rule for exponents	2	<a href="#">A.SSE.B.03.c</a>	7.1	n/a	order of magnitude, power, exponent, base	<a href="https://www.khanacademy.org/math/algebra-basics/alg-basics-expressions-with-exponents/alg-basics-exponent-properties/v/exponent-properties-involving-products">https://www.khanacademy.org/math/algebra-basics/alg-basics-expressions-with-exponents/alg-basics-exponent-properties/v/exponent-properties-involving-products</a>
1.10	II.) Polynomial Operations	3.) Multiply polynomials [Include area, volume, and products with more than one variable $(x+y)(2x-3y)$ ]	3	<a href="#">A.APR.A.01</a>	8.2	6.5	polynomial, binomial	<a href="https://www.khanacademy.org/math/algebra/introduction-to-polynomial-expressions/multiplying-polynomials-by-monomials/v/multiplying-monomials-by-polynomials">https://www.khanacademy.org/math/algebra/introduction-to-polynomial-expressions/multiplying-polynomials-by-monomials/v/multiplying-monomials-by-polynomials</a> <a href="https://www.khanacademy.org/math/algebra/introduction-to-polynomial-expressions/multiplying-binomials-2/v/area-model-for-multiplying-binomials">https://www.khanacademy.org/math/algebra/introduction-to-polynomial-expressions/multiplying-binomials-2/v/area-model-for-multiplying-binomials</a> <a href="https://www.khanacademy.org/math/algebra/introduction-to-polynomial-expressions/modeling-with-polynomials/v/multiplying-polynomials-3">https://www.khanacademy.org/math/algebra/introduction-to-polynomial-expressions/modeling-with-polynomials/v/multiplying-polynomials-3</a>

Unit 2	Topic	STUDENT LEARNING OBJECTIVES	Suggested Days	NJ Math Standard	Textbook Reference		Key Vocabulary (from textbooks)	Khan Academy Links
					Larson (H and CP)	Holt (C and Apps 1)		
2.01	II.) Polynomial Operations	4.) Determine special products of polynomials (The square of a binomial and difference of squares)	3	<a href="#">A.APR.A.01</a>	8.3	6.6	trinomial	<a href="https://www.khanacademy.org/math/algebra/introduction-to-polynomial-expressions/special-products-of-polynomials/v/difference-of-squares-pattern-for-simple-binomials">https://www.khanacademy.org/math/algebra/introduction-to-polynomial-expressions/special-products-of-polynomials/v/difference-of-squares-pattern-for-simple-binomials</a>
2.02	II.) Polynomial Operations	5.) Determine the greatest common factor of a polynomial and use it to factor the expression	2	<a href="#">A.SSE.A.02</a>	N/A	7.1, 7.2		<a href="https://www.khanacademy.org/math/algebra/polynomial-factorization/factoring-polynomials-1-common-factors/v/factoring-linear-binomials">https://www.khanacademy.org/math/algebra/polynomial-factorization/factoring-polynomials-1-common-factors/v/factoring-linear-binomials</a>
2.03	III.) Factoring, Solving & Graphing Quadratics	1.) Factor and solve $x^2+bx+c$	3	<a href="#">A.SSE.B.03.a</a>	8.5	7.3	zero of a function	<a href="https://www.khanacademy.org/math/algebra/polynomial-factorization/factoring-quadratics-1/v/factoring-simple-quadratic-expression">https://www.khanacademy.org/math/algebra/polynomial-factorization/factoring-quadratics-1/v/factoring-simple-quadratic-expression</a>
2.04	III.) Factoring, Solving & Graphing Quadratics	2.) Factor and solve $ax^2+bx+c$	3	<a href="#">A.SSE.B.03.a</a>	8.6	7.4	roots, vertical motion model	<a href="https://www.khanacademy.org/math/algebra/polynomial-factorization/factoring-quadratics-2/v/factor-by-grouping-and-factoring-completely">https://www.khanacademy.org/math/algebra/polynomial-factorization/factoring-quadratics-2/v/factor-by-grouping-and-factoring-completely</a>
2.05	III.) Factoring, Solving & Graphing Quadratics	3.) Factor and solve special products of polynomials	1	<a href="#">A.SSE.A.02</a>	8.7	7.5	perfect square trinomial	<a href="https://www.khanacademy.org/math/algebra-home/alg-polynomials/alg-factoring-polynomials-3-special-product-forms/v/factoring-difference-of-squares">https://www.khanacademy.org/math/algebra-home/alg-polynomials/alg-factoring-polynomials-3-special-product-forms/v/factoring-difference-of-squares</a> <a href="https://www.khanacademy.org/math/algebra/polynomial-factorization/factoring-quadratics-perfect-squares/v/factoring-perfect-square-trinomials">https://www.khanacademy.org/math/algebra/polynomial-factorization/factoring-quadratics-perfect-squares/v/factoring-perfect-square-trinomials</a>
2.06	III.) Factoring, Solving & Graphing Quadratics	4.) Solve quadratic equations by using the quadratic formula (Include the relationship of the discriminant value to the number/types of solutions)	3	<a href="#">A.CED.A.01</a> <a href="#">A.REI.B.04.b</a>	9.6	8.9	quadratic formula	<a href="https://www.khanacademy.org/math/algebra/quadratics/solving-quadratics-using-the-quadratic-formula/v/using-the-quadratic-formula">https://www.khanacademy.org/math/algebra/quadratics/solving-quadratics-using-the-quadratic-formula/v/using-the-quadratic-formula</a> <a href="https://www.khanacademy.org/math/algebra/quadratics/solving-quadratics-using-the-quadratic-formula/v/quadratic-formula-3">https://www.khanacademy.org/math/algebra/quadratics/solving-quadratics-using-the-quadratic-formula/v/quadratic-formula-3</a>

2.07	III.) Factoring, Solving & Graphing Quadratics	5.) Graph quadratic functions and show symmetry, intercepts, maxima, minima, end behavior, increasing/decreasing intervals	2	<a href="#">A.APR.B.03</a> <a href="#">A.REI.D.10</a> <a href="#">A.CED.A.02</a> <a href="#">F.IF.C.07</a> <a href="#">F.IF.C.07.c</a>	9.1, 9.2	8.2, 8.3, 8.4	quadratic function, parabola, parent quadratic function, vertex, axis of symmetry, minimum value, maximum value	<a href="https://www.khanacademy.org/math/algebra-home/alg-quadratics/alg-graphing-quadratic-functions/v/graphing-a-quadratic-function">https://www.khanacademy.org/math/algebra-home/alg-quadratics/alg-graphing-quadratic-functions/v/graphing-a-quadratic-function</a>
2.08	III.) Factoring, Solving & Graphing Quadratics	6.) Relate the graph of a quadratic function to the solutions attained by factoring and by using the quadratic formula. Continue to do this for future objectives (**Greatest Worksheet Ever)	4	<a href="#">F.IF.C.09</a> <a href="#">F.IF.C.08.a</a> <a href="#">F.IF.C.07.a</a>	N/A	N/A		
2.09	III.) Factoring, Solving & Graphing Quadratics	7.) Use square roots to solve quadratic equations (Approximate the value for $7+\sqrt{3}$ and explain why it is irrational)	2	<a href="#">A.REI.B.04.b</a> <a href="#">N.RN.B.03</a> <a href="#">N.Q.A.03</a>	9.4, 2.1	8.7	square root, perfect square	<a href="https://www.khanacademy.org/math/algebra/quadratics/quadratics-square-root/v/simple-quadratic-equation">https://www.khanacademy.org/math/algebra/quadratics/quadratics-square-root/v/simple-quadratic-equation</a>
2.10	III.) Factoring, Solving & Graphing Quadratics	8.) Change quadratic functions from standard form to vertex form by completing the square and vice versa. Solve and graph functions in vertex form.	4	<a href="#">A.SSE.B.03.b</a> <a href="#">A.REI.B.04.a</a>	9.5, 9.5 ext.	8.8	completing the square	<a href="https://www.khanacademy.org/math/algebra/quadratics/solving-quadratics-by-completing-the-square/v/solving-quadratic-equations-by-completing-the-square">https://www.khanacademy.org/math/algebra/quadratics/solving-quadratics-by-completing-the-square/v/solving-quadratic-equations-by-completing-the-square</a> <a href="https://www.khanacademy.org/math/algebra/quadratics/solving-quadratics-by-completing-the-square/v/solving-quadratic-equations-by-completing-the-square">https://www.khanacademy.org/math/algebra/quadratics/solving-quadratics-by-completing-the-square/v/solving-quadratic-equations-by-completing-the-square</a>
2.11	III.) Factoring, Solving & Graphing Quadratics	9.) Factor polynomials completely to understand the relationship between zeros and factors. (Include factoring four terms by grouping) Solve polynomial equations by choosing the most efficient method(s).	3	<a href="#">A.APR.B.03</a> <a href="#">A.SSE.B.03.a</a> <a href="#">A.REI.B.04.b</a>	8.8	7.6	factor by grouping, factor completely	<a href="https://www.khanacademy.org/math/algebra-basics/alg-basics-quadratics-and-polynomials/alg-basics-factoring-quadratics-2/v/factor-by-grouping-and-factoring-completely">https://www.khanacademy.org/math/algebra-basics/alg-basics-quadratics-and-polynomials/alg-basics-factoring-quadratics-2/v/factor-by-grouping-and-factoring-completely</a> <a href="https://www.khanacademy.org/math/algebra/quadratics/solving-quadratic-equations-by-factoring/v/using-structure-to-solve-quadratics">https://www.khanacademy.org/math/algebra/quadratics/solving-quadratic-equations-by-factoring/v/using-structure-to-solve-quadratics</a>
2.12	IV.) Exponential Functions and Graphs	1.) Use and apply the zero and negative rules for exponents	2	<a href="#">A.SSE.B.03.c</a>	7.3	6.1	reciprocal	<a href="https://www.khanacademy.org/math/algebra-basics/alg-basics-expressions-with-exponents/alg-basics-pos-neg-exponents/v/negative-exponents">https://www.khanacademy.org/math/algebra-basics/alg-basics-expressions-with-exponents/alg-basics-pos-neg-exponents/v/negative-exponents</a>

2.13	IV.) Exponential Functions and Graphs	2.) Graph and analyze exponential growth & decay functions. Analyze intercepts, end behavior, increasing/decreasing intervals, and asymptote. Recognize situations in which a quantity grows or decays by a constant percent rate per unit interval relative to another.	4	<a href="#">F.IF.C.07.d</a> <a href="#">F.IF.C.07.e</a> <a href="#">F.IF.C.08.b</a> <a href="#">F.LE.A.01.c</a> <a href="#">A.SSE.B.03.c</a> <a href="#">A.REI.D.10</a>	7.4, 7.5	9.3	exponential function, exponential graph, compound interest	<a href="https://www.khanacademy.org/math/algebra/introduction-to-exponential-functions/exponential-growth-and-decay/v/exponential-growth-functions">https://www.khanacademy.org/math/algebra/introduction-to-exponential-functions/exponential-growth-and-decay/v/exponential-growth-functions</a>  <a href="https://www.khanacademy.org/math/algebra/introduction-to-exponential-functions">https://www.khanacademy.org/math/algebra/introduction-to-exponential-functions</a>

Unit 3	Topic	STUDENT LEARNING OBJECTIVES	Suggested Days	NJ Math Standard	Textbook Reference		Key Vocabulary (from textbooks)	Khan Academy Links
					Larson (H and CP)	Holt (C and Apps 1)		
3.01	V.) Functions	1.) Determine whether a relation is a function. Choose an appropriate domain and range to represent a function.	2	<a href="#">F.IF.A.01</a> <a href="#">F.IF.B.05</a>	1.7, 1.8, 1.8 ext.	3.2	function, domain, range, independent variable, dependent variable	<a href="https://www.khanacademy.org/math/algebra/algebra-functions/evaluating-functions/v/what-is-a-function">https://www.khanacademy.org/math/algebra/algebra-functions/evaluating-functions/v/what-is-a-function</a> <a href="https://www.khanacademy.org/math/algebra/algebra-functions/domain-and-range/v/domain-of-a-function-intro">https://www.khanacademy.org/math/algebra/algebra-functions/domain-and-range/v/domain-of-a-function-intro</a> <a href="https://www.khanacademy.org/math/algebra-home/alg-functions/alg-determining-the-domain-of-a-function/v/domain-of-a-modeling-function-example-1">https://www.khanacademy.org/math/algebra-home/alg-functions/alg-determining-the-domain-of-a-function/v/domain-of-a-modeling-function-example-1</a>
3.02	V.) Functions	2.) Use function notation, evaluate functions for inputs in their domains, and interpret statements that use function notation in terms of a context. (Start using function notation in more and more problems)	3	<a href="#">F.IF.A.02</a> <a href="#">F.IF.B.05</a> <a href="#">F.BF.A.01.a</a>	3.7	3.3	function notation, family of functions, parent linear function	<a href="https://www.khanacademy.org/math/algebra/algebra-functions/evaluating-functions/v/understanding-function-notation-example-1">https://www.khanacademy.org/math/algebra/algebra-functions/evaluating-functions/v/understanding-function-notation-example-1</a>
3.03	VI.) Graphing Linear Equations and Functions	1.) Graph linear equations by making a table and using substitution (Discuss the effect the domain has in producing discrete and continuous functions)	2	<a href="#">A.CED.A.02</a> <a href="#">A.REI.D.10</a>	3.2, 3.2 ext.	4.1	standard form of a linear function, discrete function, continuous function	<a href="https://www.khanacademy.org/math/algebra-basics/alg-basics-graphing-lines-and-slope/alg-basics-solutions-to-two-var-equations/v/2-variable-linear-equations-graphs">https://www.khanacademy.org/math/algebra-basics/alg-basics-graphing-lines-and-slope/alg-basics-solutions-to-two-var-equations/v/2-variable-linear-equations-graphs</a> <a href="https://www.khanacademy.org/math/cc-eighth-grade-math/cc-8th-linear-equations-functions/8th-solutions-to-two-var-linear-equations/v/descartes-and-cartesian-coordinates">https://www.khanacademy.org/math/cc-eighth-grade-math/cc-8th-linear-equations-functions/8th-solutions-to-two-var-linear-equations/v/descartes-and-cartesian-coordinates</a>
3.04	VI.) Graphing Linear Equations and Functions	2.) Graph using linear equations by using intercepts	2	<a href="#">A.CED.A.02</a> <a href="#">F.IF.C.07.a</a>	3.3	4.2	x-intercept, y-intercept	<a href="https://www.khanacademy.org/math/algebra/two-var-linear-equations/x-and-y-intercepts/v/introduction-to-intercepts">https://www.khanacademy.org/math/algebra/two-var-linear-equations/x-and-y-intercepts/v/introduction-to-intercepts</a>
3.05	VI.) Graphing Linear Equations and Functions	3.) Calculate and interpret the average rate of change of a function (presented symbolically or as a table) over a specified interval. Estimate the rate of change from <b>any type</b> of graph. (linear, polynomial, exponential, root, absolute value...) Use appropriate units and rounding.	2	<a href="#">F.LE.A.01.b</a> <a href="#">F.IF.B.06</a> <a href="#">N.Q.A.01</a> <a href="#">N.Q.A.02</a>	3.4	4.3, 4.4	slope, rate of change	<a href="https://www.khanacademy.org/math/algebra-basics/alg-basics-graphing-lines-and-slope/alg-basics-slope/v/introduction-to-slope">https://www.khanacademy.org/math/algebra-basics/alg-basics-graphing-lines-and-slope/alg-basics-slope/v/introduction-to-slope</a> <a href="https://www.khanacademy.org/math/algebra/algebra-functions/functions-average-rate-of-change/v/introduction-to-average-rate-of-change">https://www.khanacademy.org/math/algebra/algebra-functions/functions-average-rate-of-change/v/introduction-to-average-rate-of-change</a> <a href="https://www.khanacademy.org/math/algebra-home/alg-functions/alg-average-rate-of-change-word-problems/v/average-rate-of-change-from-table-word-problem">https://www.khanacademy.org/math/algebra-home/alg-functions/alg-average-rate-of-change-word-problems/v/average-rate-of-change-from-table-word-problem</a>

3.06	VI.) Graphing Linear Equations and Functions	4.) Graph and model with slope-intercept form. Write and graph functions that are based on two or more other equations.	5	<a href="#">A.CED.A.02</a> <a href="#">A.CED.A.04</a> <a href="#">N.Q.A.01</a> <a href="#">F.BF.A.01.b</a>	3.5, 4.2	4.6	slope intercept form, parallel	<a href="https://www.khanacademy.org/math/algebra-home/alg-linear-eq-func/alg-graphing-slope-intercept-equations/v/graphing-a-line-in-slope-intercept-form">https://www.khanacademy.org/math/algebra-home/alg-linear-eq-func/alg-graphing-slope-intercept-equations/v/graphing-a-line-in-slope-intercept-form</a> <a href="https://www.khanacademy.org/math/algebra-home/alg-linear-eq-func/alg-writing-slope-intercept-equations/v/graphs-using-slope-intercept-form">https://www.khanacademy.org/math/algebra-home/alg-linear-eq-func/alg-writing-slope-intercept-equations/v/graphs-using-slope-intercept-form</a>
3.07	VI.) Graphing Linear Equations and Functions	5.) Fit a linear function to a scatterplot and determine its equation. Relate the meaning of the slope and intercept to the data. Distinguish between correlation and causation.	3	<a href="#">S.ID.B.05</a> <a href="#">S.ID.B.06.a</a> <a href="#">S.ID.B.06.b</a> <a href="#">S.ID.B.06.c</a> <a href="#">S.ID.C.07</a> <a href="#">S.ID.C.08</a> <a href="#">S.ID.C.09</a>	4.7, 4.7 ext.	4.8	best fitting line, linear regression, interpolation, extrapolation, zero of a function	<a href="https://www.khanacademy.org/math/probability/scatterplots-a1/creating-interpreting-scatterplots/v/scatter-plot-interpreting">https://www.khanacademy.org/math/probability/scatterplots-a1/creating-interpreting-scatterplots/v/scatter-plot-interpreting</a> <a href="https://www.khanacademy.org/math/probability/scatterplots-a1/estimating-trend-lines/v/estimating-the-line-of-best-fit-exercise">https://www.khanacademy.org/math/probability/scatterplots-a1/estimating-trend-lines/v/estimating-the-line-of-best-fit-exercise</a>
3.08	VII.) Systems of Equations and Inequalities	1.) Graph linear systems [Explain why the x-coordinates of the points where the graphs of the equations $y=f(x)$ and $y=g(x)$ intersect are the solutions of the equation $f(x) = g(x)$ ]	2	<a href="#">A.CED.A.03</a> <a href="#">A.CED.A.04</a> <a href="#">A.REI.D.11</a>	6.1	5.1	system of linear equations, solution of a system of linear equations,	<a href="https://www.khanacademy.org/math/cc-eighth-grade-math/cc-8th-systems-topic/cc-8th-systems-graphically/v/solving-linear-systems-by-graphing">https://www.khanacademy.org/math/cc-eighth-grade-math/cc-8th-systems-topic/cc-8th-systems-graphically/v/solving-linear-systems-by-graphing</a> <a href="https://www.khanacademy.org/math/algebra/systems-of-linear-equations/introduction-to-systems-of-linear-equations/v/testing-a-solution-for-a-system-of-equations">https://www.khanacademy.org/math/algebra/systems-of-linear-equations/introduction-to-systems-of-linear-equations/v/testing-a-solution-for-a-system-of-equations</a>
3.09	VII.) Systems of Equations and Inequalities	2.) Solve linear systems by elimination (linear combination)	3	<a href="#">A.CED.A.03</a> <a href="#">A.REI.C.05</a> <a href="#">A.REI.C.06</a>	6.3, 6.4	5.3, 5.6	least common multiple	<a href="https://www.khanacademy.org/math/algebra-basics/alg-basics-systems-of-equations/alg-basics-elimination-method-systems/v/simple-elimination-practice">https://www.khanacademy.org/math/algebra-basics/alg-basics-systems-of-equations/alg-basics-elimination-method-systems/v/simple-elimination-practice</a>

	DOMAIN.CLUSTER.STANDARD.component	□	Supporting Content	
		○	Additional Content	
Content Standards CCCSM Number	Content Standards Description	Type of Content	Illustrative Mathematics Open-Ended Problems <a href="https://www.illustrativemathematics.org/">https://www.illustrativemathematics.org/</a>	
<b>Unit 1</b>	A.SSE.A.01.b	b. Interpret complicated expressions by viewing one or more of their parts as a single entity. For example, interpret $P(1+r)^n$ as the product of P and a factor not depending on P	■	<a href="https://www.illustrativemathematics.org/HSA-SSE.A">https://www.illustrativemathematics.org/HSA-SSE.A</a>
	A.APR.A.01	1. Understand that polynomials form a system analogous to the integers, namely, they are closed under the operations of addition, subtraction, and multiplication; add, subtract, and multiply polynomials.	■	<a href="https://www.illustrativemathematics.org/HSA-APR.A">https://www.illustrativemathematics.org/HSA-APR.A</a>
	A.CED.A.01	1. Create equations and inequalities in one variable and use them to solve problems. Include equations arising from linear and quadratic functions, and simple rational and exponential functions.	■	<a href="https://www.illustrativemathematics.org/HSA-CED.A">https://www.illustrativemathematics.org/HSA-CED.A</a>
	A.REI.A.01	1. Explain each step in solving a simple equation as following from the equality of numbers asserted at the previous step, starting from the assumption that the original equation has a solution. Construct a viable argument to justify a solution method.	■	<a href="https://www.illustrativemathematics.org/HSA-REI.A">https://www.illustrativemathematics.org/HSA-REI.A</a>
	A.REI.B.03	3. Solve linear equations and inequalities in one variable, including equations with coefficients represented by letters.	■	<a href="https://www.illustrativemathematics.org/HSA-REI.B">https://www.illustrativemathematics.org/HSA-REI.B</a>
	A.SSE.A.02	2. Use the structure of an expression to identify ways to rewrite it. For example, see $x^4 - y^4$ as $(x^2)^2 - (y^2)^2$ , thus recognizing it as a difference of squares that can be factored as $(x^2 - y^2)(x^2 + y^2)$ .	■	<a href="https://www.illustrativemathematics.org/HSA-SSE.A">https://www.illustrativemathematics.org/HSA-SSE.A</a>
	A.SSE.B.03.c	c. Use the properties of exponents to transform expressions for exponential functions. For example the expression $1.15t$ can be rewritten as $(1.151/12)^{12t} \approx 1.012^{12t}$ to reveal the approximate equivalent monthly interest rate if the annual rate is 15%.	□	<a href="https://www.illustrativemathematics.org/HSA-SSE.B">https://www.illustrativemathematics.org/HSA-SSE.B</a>
	F.IF.A.02	2. Use function notation, evaluate functions for inputs in their domains, and interpret statements that use function notation in terms of a context.	■	<a href="https://www.illustrativemathematics.org/HSF-IF.A">https://www.illustrativemathematics.org/HSF-IF.A</a>

	F.LE.A.01.b	b. Recognize situations in which one quantity changes at a constant rate per unit interval relative to another.	<input type="checkbox"/>	<a href="https://www.illustrativemathematics.org/HSF-BF.A">https://www.illustrativemathematics.org/HSF-BF.A</a>
	N.Q.A.01	1. Use units as a way to understand problems and to guide the solution of multi-step problems; choose and interpret units consistently in formulas; choose and interpret the scale and the origin in graphs and data displays.	<input type="checkbox"/>	<a href="https://www.illustrativemathematics.org/HSN-Q.A">https://www.illustrativemathematics.org/HSN-Q.A</a>
	N.RN.B.03	3. Explain why the sum or product of two rational numbers is rational; that the sum of a rational number and an irrational number is irrational; and that the product of a nonzero rational number and an irrational number is irrational.	<input type="radio"/>	<a href="https://www.illustrativemathematics.org/HSN-RN.B">https://www.illustrativemathematics.org/HSN-RN.B</a>

<b>Unit 2</b>	A.APR.B.03	3. Identify zeros of polynomials when suitable factorizations are available, and use the zeros to construct a rough graph of the function defined by the polynomial.	<input type="checkbox"/>	<a href="https://www.illustrativemathematics.org/HSA-APR.B">https://www.illustrativemathematics.org/HSA-APR.B</a>
	A.CED.A.01	1. Create equations and inequalities in one variable and use them to solve problems. Include equations arising from linear and quadratic functions, and simple rational and exponential functions.	<input checked="" type="checkbox"/>	<a href="https://www.illustrativemathematics.org/HSA-CED.A">https://www.illustrativemathematics.org/HSA-CED.A</a>
	A.CED.A.02	2. Create equations in two or more variables to represent relationships between quantities; graph equations on coordinate axes with labels and scales.	<input checked="" type="checkbox"/>	<a href="https://www.illustrativemathematics.org/HSA-CED.A">https://www.illustrativemathematics.org/HSA-CED.A</a>
	A.REI.B.04.a	a. Use the method of completing the square to transform any quadratic equation in $x$ into an equation of the form $(x - p)^2 = q$ that has the same solutions. Derive the quadratic formula from this form.	<input checked="" type="checkbox"/>	<a href="https://www.illustrativemathematics.org/HSA-REI.B">https://www.illustrativemathematics.org/HSA-REI.B</a>
	A.REI.B.04.b	b. Solve quadratic equations by inspection (e.g., for $x^2 = 49$ ), taking square roots, completing the square, the quadratic formula and factoring, as appropriate to the initial form of the equation. Recognize when the quadratic formula gives complex solutions and write them as $a \pm bi$ for real numbers $a$ and $b$ .	<input checked="" type="checkbox"/>	<a href="https://www.illustrativemathematics.org/HSA-REI.B">https://www.illustrativemathematics.org/HSA-REI.B</a>
	A.REI.D.10	10. Understand that the graph of an equation in two variables is the set of all its solutions plotted in the coordinate plane, often forming a curve (which could be a line).	<input checked="" type="checkbox"/>	<a href="https://www.illustrativemathematics.org/HSA-REI.D">https://www.illustrativemathematics.org/HSA-REI.D</a>
	A.SSE.A.02	2. Use the structure of an expression to identify ways to rewrite it. For example, see $x^4 - y^4$ as $(x^2)^2 - (y^2)^2$ , thus recognizing it as a difference of squares that can be factored as $(x^2 - y^2)(x^2 + y^2)$ .	<input checked="" type="checkbox"/>	<a href="https://www.illustrativemathematics.org/HSA-SSE.A">https://www.illustrativemathematics.org/HSA-SSE.A</a>
	A.SSE.B.03.a	a. Factor a quadratic expression to reveal the zeros of the function it defines.	<input type="checkbox"/>	<a href="https://www.illustrativemathematics.org/HSA-SSE.B">https://www.illustrativemathematics.org/HSA-SSE.B</a>
	A.SSE.B.03.b	b. Complete the square in a quadratic expression to reveal the maximum or minimum value of the function it defines.	<input type="checkbox"/>	<a href="https://www.illustrativemathematics.org/HSA-SSE.B">https://www.illustrativemathematics.org/HSA-SSE.B</a>

A.SSE.B.03.c	c. Use the properties of exponents to transform expressions for exponential functions. For example the expression $1.15t$ can be rewritten as $(1.151/12)^{12t} \approx 1.012^{12t}$ to reveal the approximate equivalent monthly interest rate if the annual rate is 15%.	<input type="checkbox"/>	<a href="https://www.illustrativemathematics.org/HSA-SSE.B">https://www.illustrativemathematics.org/HSA-SSE.B</a>
F.BF.A.01.a	a. Determine an explicit expression, a recursive process, or steps for calculation from a context.	<input type="checkbox"/>	<a href="https://www.illustrativemathematics.org/HSF-BF.A">https://www.illustrativemathematics.org/HSF-BF.A</a>
F.IF.A.01	1. Understand that a function from one set (called the domain) to another set (called the range) assigns to each element of the domain exactly one element of the range. If $f$ is a function and $x$ is an element of its domain, then $f(x)$ denotes the output of $f$ corresponding to the input $x$ . The graph of $f$ is the graph of the equation $y = f(x)$ .	■	<a href="https://www.illustrativemathematics.org/HSF-IF.A">https://www.illustrativemathematics.org/HSF-IF.A</a>
F.IF.A.02	2. Use function notation, evaluate functions for inputs in their domains, and interpret statements that use function notation in terms of a context.	■	<a href="https://www.illustrativemathematics.org/HSF-IF.A">https://www.illustrativemathematics.org/HSF-IF.A</a>
F.IF.B.05	5. Relate the domain of a function to its graph and, where applicable, to the quantitative relationship it describes. For example, if the function $h(n)$ gives the number of person-hours it takes to assemble $n$ engines in a factory, then the positive integers would be an appropriate domain for the function.★	■	<a href="https://www.illustrativemathematics.org/HSF-IF.B">https://www.illustrativemathematics.org/HSF-IF.B</a>
F.IF.C.07	7. Graph functions expressed symbolically and show key features of the graph, by hand in simple cases and using technology for more complicated cases.★	<input type="checkbox"/>	<a href="https://www.illustrativemathematics.org/HSF-IF.C">https://www.illustrativemathematics.org/HSF-IF.C</a>
F.IF.C.07.a	a. Graph linear and quadratic functions and show intercepts, maxima, and minima.	<input type="checkbox"/>	<a href="https://www.illustrativemathematics.org/HSF-IF.C">https://www.illustrativemathematics.org/HSF-IF.C</a>
F.IF.C.07.c	c. Graph polynomial functions, identifying zeros when suitable factorizations are available, and showing end behavior.	<input type="checkbox"/>	<a href="https://www.illustrativemathematics.org/HSF-IF.C">https://www.illustrativemathematics.org/HSF-IF.C</a>
F.IF.C.07.d	d. (+) Graph rational functions, identifying zeros and asymptotes when suitable factorizations are available, and showing end behavior.	<input type="checkbox"/>	<a href="https://www.illustrativemathematics.org/HSF-IF.C">https://www.illustrativemathematics.org/HSF-IF.C</a>
F.IF.C.07.e	e. Graph exponential and logarithmic functions, showing intercepts and end behavior, and trigonometric functions, showing period, midline, and amplitude.	<input type="checkbox"/>	<a href="https://www.illustrativemathematics.org/HSF-IF.C">https://www.illustrativemathematics.org/HSF-IF.C</a>
F.IF.C.08.a	a. Use the process of factoring and completing the square in a quadratic function to show zeros, extreme values, and symmetry of the graph, and interpret these in terms of a context.	<input type="checkbox"/>	<a href="https://www.illustrativemathematics.org/HSF-IF.C">https://www.illustrativemathematics.org/HSF-IF.C</a>
F.IF.C.08.b	b. Use the properties of exponents to interpret expressions for exponential functions. For example, identify percent rate of change in functions such as $y = (1.02)^t$ , $y = (0.97)^t$ , $y = (1.01)^{12t}$ , $y = (1.2)^{t/10}$ , and classify them as representing exponential growth or decay.	<input type="checkbox"/>	<a href="https://www.illustrativemathematics.org/HSF-IF.C">https://www.illustrativemathematics.org/HSF-IF.C</a>
F.IF.C.09	9. Compare properties of two functions each represented in a different way (algebraically, graphically, numerically in tables, or by verbal descriptions). For example, given a graph of one quadratic function and an algebraic expression for another, say which has the larger maximum.	<input type="checkbox"/>	<a href="https://www.illustrativemathematics.org/HSF-IF.C">https://www.illustrativemathematics.org/HSF-IF.C</a>

	F.LE.A.01.c	c. Recognize situations in which a quantity grows or decays by a constant percent rate per unit interval relative to another.	□	<a href="https://www.illustrativemathematics.org/HSF-BF.A">https://www.illustrativemathematics.org/HSF-BF.A</a>
	N.Q.A.03	3. Choose a level of accuracy appropriate to limitations on measurement when reporting quantities.	□	<a href="https://www.illustrativemathematics.org/HSN-Q.A">https://www.illustrativemathematics.org/HSN-Q.A</a>
	N.RN.B.03	3. Explain why the sum or product of two rational numbers is rational; that the sum of a rational number and an irrational number is irrational; and that the product of a nonzero rational number and an irrational number is irrational.	○	<a href="https://www.illustrativemathematics.org/HSN-RN.B">https://www.illustrativemathematics.org/HSN-RN.B</a>

<b>Unit 3</b>	A.CED.A.02	2. Create equations in two or more variables to represent relationships between quantities; graph equations on coordinate axes with labels and scales.	■	<a href="https://www.illustrativemathematics.org/HSA-CED.A">https://www.illustrativemathematics.org/HSA-CED.A</a>
	A.CED.A.03	3. Represent constraints by equations or inequalities, and by systems of equations and/or inequalities, and interpret solutions as viable or nonviable options in a modeling context. For example, represent inequalities describing nutritional and cost constraints on combinations of different foods.	■	<a href="https://www.illustrativemathematics.org/HSA-CED.A">https://www.illustrativemathematics.org/HSA-CED.A</a>
	A.CED.A.04	4. Rearrange formulas to highlight a quantity of interest, using the same reasoning as in solving equations. For example, rearrange Ohm's law $V = IR$ to highlight resistance $R$ .	■	<a href="https://www.illustrativemathematics.org/HSA-CED.A">https://www.illustrativemathematics.org/HSA-CED.A</a>
	A.REI.C.05	5. Prove that, given a system of two equations in two variables, replacing one equation by the sum of that equation and a multiple of the other produces a system with the same solutions.	○	<a href="https://www.illustrativemathematics.org/HSA-REI.C">https://www.illustrativemathematics.org/HSA-REI.C</a>
	A.REI.C.06	6. Solve systems of linear equations exactly and approximately (e.g., with graphs), focusing on pairs of linear equations in two variables.	○	<a href="https://www.illustrativemathematics.org/HSA-REI.C">https://www.illustrativemathematics.org/HSA-REI.C</a>
	A.REI.D.10	10. Understand that the graph of an equation in two variables is the set of all its solutions plotted in the coordinate plane, often forming a curve (which could be a line).	■	<a href="https://www.illustrativemathematics.org/HSA-REI.D">https://www.illustrativemathematics.org/HSA-REI.D</a>
	A.REI.D.11	11. Explain why the x-coordinates of the points where the graphs of the equations $y = f(x)$ and $y = g(x)$ intersect are the solutions of the equation $f(x) = g(x)$ ; find the solutions approximately, e.g., using technology to graph the functions, make tables of values, or find successive approximations. Include cases where $f(x)$ and/or $g(x)$ are linear, polynomial, rational, absolute value, exponential, and logarithmic functions.★	■	<a href="https://www.illustrativemathematics.org/HSA-REI.D">https://www.illustrativemathematics.org/HSA-REI.D</a>
	A.REI.D.12	12. Graph the solutions to a linear inequality in two variables as a half plane (excluding the boundary in the case of a strict inequality), and graph the solution set to a system of linear inequalities in two variables as the intersection of the corresponding half-planes.	■	<a href="https://www.illustrativemathematics.org/HSA-REI.D">https://www.illustrativemathematics.org/HSA-REI.D</a>

F.BF.A.01.b	b. Combine standard function types using arithmetic operations. For example, build a function that models the temperature of a cooling body by adding a constant function to a decaying exponential, and relate these functions to the model.	<input type="checkbox"/>	<a href="https://www.illustrativemathematics.org/HSF-BF.A">https://www.illustrativemathematics.org/HSF-BF.A</a>
F.BF.A.01.c	c. (+) Compose functions. For example, if $T(y)$ is the temperature in the atmosphere as a function of height, and $h(t)$ is the height of a weather balloon as a function of time, then $T(h(t))$ is the temperature at the location of the weather balloon as a function of time.	<input type="checkbox"/>	<a href="https://www.illustrativemathematics.org/HSF-BF.A">https://www.illustrativemathematics.org/HSF-BF.A</a>
F.BF.B.03	3. Identify the effect on the graph of replacing $f(x)$ by $f(x) + k$ , $k f(x)$ , $f(kx)$ , and $f(x + k)$ for specific values of $k$ (both positive and negative); find the value of $k$ given the graphs. Experiment with cases and illustrate an explanation of the effects on the graph using technology. Include recognizing even and odd functions from their graphs and algebraic expressions for them.	<input type="radio"/>	<a href="https://www.illustrativemathematics.org/HSF-BF.B">https://www.illustrativemathematics.org/HSF-BF.B</a>
F.IF.B.06	6. Calculate and interpret the average rate of change of a function (presented symbolically or as a table) over a specified interval. Estimate the rate of change from a graph. ★	<input type="checkbox"/>	<a href="https://www.illustrativemathematics.org/HSF-IF.B">https://www.illustrativemathematics.org/HSF-IF.B</a>
F.IF.C.07.a	a. Graph linear and quadratic functions and show intercepts, maxima, and minima.	<input type="checkbox"/>	<a href="https://www.illustrativemathematics.org/HSF-IF.C">https://www.illustrativemathematics.org/HSF-IF.C</a>
F.IF.C.07.b	b. Graph square root, cube root, and piecewise-defined functions, including step functions and absolute value functions.	<input type="checkbox"/>	<a href="https://www.illustrativemathematics.org/HSF-IF.C">https://www.illustrativemathematics.org/HSF-IF.C</a>
F.LE.A.01.a	a. Prove that linear functions grow by equal differences over equal intervals, and that exponential functions grow by equal factors over equal intervals.	<input type="checkbox"/>	<a href="https://www.illustrativemathematics.org/HSF-BF.A">https://www.illustrativemathematics.org/HSF-BF.A</a>
F.LE.A.01.b	b. Recognize situations in which one quantity changes at a constant rate per unit interval relative to another.	<input type="checkbox"/>	<a href="https://www.illustrativemathematics.org/HSF-BF.A">https://www.illustrativemathematics.org/HSF-BF.A</a>
F.LE.A.02	2. Construct linear and exponential functions, including arithmetic and geometric sequences, given a graph, a description of a relationship, or two input-output pairs (include reading these from a table).	<input type="checkbox"/>	<a href="https://www.illustrativemathematics.org/HSF-BF.A">https://www.illustrativemathematics.org/HSF-BF.A</a>
F.LE.A.03	3. Observe using graphs and tables that a quantity increasing exponentially eventually exceeds a quantity increasing linearly, quadratically, or (more generally) as a polynomial function.	<input type="checkbox"/>	<a href="https://www.illustrativemathematics.org/HSF-BF.A">https://www.illustrativemathematics.org/HSF-BF.A</a>
F.LE.B.05	5. Interpret the parameters in a linear or exponential function in terms of a context.	<input type="checkbox"/>	0
N.Q.A.01	1. Use units as a way to understand problems and to guide the solution of multi-step problems; choose and interpret units consistently in formulas; choose and interpret the scale and the origin in graphs and data displays.	<input type="checkbox"/>	<a href="https://www.illustrativemathematics.org/HSN-Q.A">https://www.illustrativemathematics.org/HSN-Q.A</a>
N.Q.A.02	2. Define appropriate quantities for the purpose of descriptive modeling.	<input type="checkbox"/>	<a href="https://www.illustrativemathematics.org/HSN-Q.A">https://www.illustrativemathematics.org/HSN-Q.A</a>

	S.ID.B.05	5. Summarize categorical data for two categories in two-way frequency tables. Interpret relative frequencies in the context of the data (including joint, marginal, and conditional relative frequencies). Recognize possible associations and trends in the data.	<input type="checkbox"/>	<a href="https://www.illustrativemathematics.org/HSS-ID.B">https://www.illustrativemathematics.org/HSS-ID.B</a>
	S.ID.B.06.a	a. Fit a function to the data (including with the use of technology); use functions fitted to data to solve problems in the context of the data. Use given functions or choose a function suggested by the context. Emphasize linear and exponential models.	<input type="checkbox"/>	<a href="https://www.illustrativemathematics.org/HSS-ID.B">https://www.illustrativemathematics.org/HSS-ID.B</a>
	S.ID.B.06.b	b. Informally assess the fit of a function by plotting and analyzing residuals, including with the use of technology.	<input type="checkbox"/>	<a href="https://www.illustrativemathematics.org/HSS-ID.B">https://www.illustrativemathematics.org/HSS-ID.B</a>
	S.ID.B.06.c	c. Fit a linear function for a scatter plot that suggests a linear association.	<input type="checkbox"/>	<a href="https://www.illustrativemathematics.org/HSS-ID.B">https://www.illustrativemathematics.org/HSS-ID.B</a>
	S.ID.C.07	7. Interpret the slope (rate of change) and the intercept (constant term) of a linear model in the context of the data.	■	<a href="https://www.illustrativemathematics.org/HSS-ID.C">https://www.illustrativemathematics.org/HSS-ID.C</a>
	S.ID.C.08	8. Compute (using technology) and interpret the correlation coefficient of a linear fit.	■	<a href="https://www.illustrativemathematics.org/HSS-ID.C">https://www.illustrativemathematics.org/HSS-ID.C</a>
	S.ID.C.09	9. Distinguish between correlation and causation.	■	<a href="https://www.illustrativemathematics.org/HSS-ID.C">https://www.illustrativemathematics.org/HSS-ID.C</a>

<b>Unit 4</b>	A.REI.B	B. Solve equations and inequalities in one variable	Cluster	<a href="https://www.illustrativemathematics.org/HSA-REI.B">https://www.illustrativemathematics.org/HSA-REI.B</a>
	A.REI.D	D. Represent and solve equations and inequalities graphically	Cluster	<a href="https://www.illustrativemathematics.org/HSA-REI.D">https://www.illustrativemathematics.org/HSA-REI.D</a>
	A.REI.D.11	11. Explain why the x-coordinates of the points where the graphs of the equations $y = f(x)$ and $y = g(x)$ intersect are the solutions of the equation $f(x) = g(x)$ ; find the solutions approximately, e.g., using technology to graph the functions, make tables of values, or find successive approximations. Include cases where $f(x)$ and/or $g(x)$ are linear, polynomial, rational, absolute value, exponential, and logarithmic functions.★	■	<a href="https://www.illustrativemathematics.org/HSA-REI.D">https://www.illustrativemathematics.org/HSA-REI.D</a>
	F.IF.C	C. Analyze functions using different representations	Cluster	<a href="https://www.illustrativemathematics.org/HSF-IF.C">https://www.illustrativemathematics.org/HSF-IF.C</a>
	F.IF.C.07.a	a. Graph linear and quadratic functions and show intercepts, maxima, and minima.	<input type="checkbox"/>	<a href="https://www.illustrativemathematics.org/HSF-IF.C">https://www.illustrativemathematics.org/HSF-IF.C</a>
	F.LE.B	B. Interpret expressions for functions in terms of the situation they model	Cluster	<a href="https://www.illustrativemathematics.org/HSF-BF.B">https://www.illustrativemathematics.org/HSF-BF.B</a>
	N.Q.A	A. Reason quantitatively and use units to solve problems.	Cluster	<a href="https://www.illustrativemathematics.org/HSN-Q.A">https://www.illustrativemathematics.org/HSN-Q.A</a>

S.ID.A.01	1. Represent data with plots on the real number line (dot plots, histograms, and box plots).	○	<a href="https://www.illustrativemathematics.org/HSS-ID.A">https://www.illustrativemathematics.org/HSS-ID.A</a>
S.ID.A.02	2. Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets.	○	<a href="https://www.illustrativemathematics.org/HSS-ID.A">https://www.illustrativemathematics.org/HSS-ID.A</a>
S.ID.A.03	3. Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers).	○	<a href="https://www.illustrativemathematics.org/HSS-ID.A">https://www.illustrativemathematics.org/HSS-ID.A</a>
S.ID.B	B. Summarize, represent, and interpret data on two categorical and quantitative variables	<b>Cluster</b>	<a href="https://www.illustrativemathematics.org/HSS-ID.B">https://www.illustrativemathematics.org/HSS-ID.B</a>
S.ID.B.05	5. Summarize categorical data for two categories in two-way frequency tables. Interpret relative frequencies in the context of the data (including joint, marginal, and conditional relative frequencies). Recognize possible associations and trends in the data.	□	<a href="https://www.illustrativemathematics.org/HSS-ID.B">https://www.illustrativemathematics.org/HSS-ID.B</a>
S.ID.C	C. Interpret linear models	<b>Cluster</b>	<a href="https://www.illustrativemathematics.org/HSS-ID.C">https://www.illustrativemathematics.org/HSS-ID.C</a>

## PARCC MODEL CONTENT FRAMEWORK FOR MATHEMATICS FOR ALGEBRA I

### Algebra I Overview

Numerals in parentheses designate individual content standards that are eligible for assessment in whole or in part. Underlined numerals (e.g., 1) indicate standards eligible for assessment on two or more end-of-course assessments. For more information, see Tables 1 and 2. Course emphases are indicated by: ■ Major Content; □ Supporting Content; ○ Additional Content. Not all CCSSM content standards in a listed domain or cluster are assessed.

#### The Real Number System (N-RN)

- B. Use properties of rational and irrational numbers (3)

#### Quantities★ (N-Q)

- A. Reason quantitatively and use units to solve problems (1, 2, 3)

#### Seeing Structure in Expressions (A-SSE)

- A. Interpret the structure of expressions (1, 2)
- B. Write expressions in equivalent forms to solve problems (3)

#### Arithmetic with Polynomials and Rational Expressions (A-APR)

- A. Perform arithmetic operations on polynomials (1)
- B. Understand the relationship between zeros and factors of polynomials (3)

#### Creating Equations★ (A-CED)

- A. Create equations that describe numbers or relationships (1, 2, 3, 4)

#### Reasoning with Equations and Inequalities (A-REI)

- A. Understand solving equations as a process of reasoning and explain the reasoning (1)
- B. Solve equations and inequalities in one variable (3, 4)
- C. Solve systems of equations (5, 6)
- D. Represent and solve equations and inequalities graphically (10, 11, 12)

#### Interpreting Functions (F-IF)

- A. Understand the concept of a function and use function notation (1, 2, 3)
- B. Interpret functions that arise in applications in terms of the context (4, 5, 6)
- C. Analyze functions using different representations (7, 8, 9)

#### Building Functions (F-BF)

- A. Build a function that models a relationship between two quantities (1)
- B. Build new functions from existing functions (3)

#### Linear, Quadratic, and Exponential Models★ (F-LE)

- A. Construct and compare linear, quadratic, and exponential models and solve problems (1, 2, 3)
- B. Interpret expressions for functions in terms of the situation they model (5)

#### Interpreting categorical and quantitative data (S-ID)

- A. Summarize, represent, and interpret data on a single count or measurement variable (1, 2, 3)
- B. Summarize, represent, and interpret data on two categorical and quantitative variables (5, 6)
- C. Interpret linear models (7, 8, 9)

#### Mathematical Practices

1. Make sense of problems and persevere in solving them.
2. Reason abstractly and quantitatively.
3. Construct viable arguments and critique the reasoning of others.
4. Model with mathematics.
5. Use appropriate tools strategically.
6. Attend to precision.
7. Look for and make use of structure.
8. Look for and express regularity in repeated reasoning.

## Mathematics Standards for High School

The high school standards specify the mathematics that all students should study in order to be college and career ready. Additional mathematics that students should learn in order to take advanced courses such as calculus, advanced statistics, or discrete mathematics is indicated by (+), as in this example:

(+) Represent complex numbers on the complex plane in rectangular and polar form (including real and imaginary numbers).

All standards without a (+) symbol should be in the common mathematics curriculum for all college and career ready students. Standards without a (+) symbol may also appear in courses intended for all students.

The high school standards are listed in conceptual categories:

- Number and Quantity
- Algebra
- Functions
- Modeling
- Geometry
- Statistics and Probability

Conceptual categories portray a coherent view of high school mathematics; a student's work with functions, for example, crosses a number of traditional course boundaries, potentially up through and including calculus.

Modeling is best interpreted not as a collection of isolated topics but in relation to other standards. Making mathematical models is a Standard for Mathematical Practice, and specific modeling standards appear throughout the high school standards indicated by a star symbol (★). The star symbol sometimes appears on the heading for a group of standards; in that case, it should be understood to apply to all standards in that group.
