

PASSAIC COUNTY TECHNICAL INSTITUTE

GRAPHIC ARTS 1 CURRICULUM GUIDE

Instructors:

Mark Phillips / Jose Arce / Luis Colón / Fernando Colón

REVISED: June 2011

I. Course Description – Graphic Arts 1

Graphic Design is a creative process that combines art and technology to communicate ideas. The designer works with a variety of communications tools in order to visually convey a message for a client's product or service to a particular target audience. This course will give students a foundation in Graphic Design by introducing them to the various aspects of the Graphic Design field.

Students will work on projects utilizing industry standard software and hardware in a classroom environment that simulates a real-world design studio. They will be introduced to the basic design principles and processes that must be followed in order to successfully complete projects that meet specific criteria.

Students will also become familiar with production techniques with industry standard software such as Adobe Photoshop, Illustrator and InDesign and post production techniques for finishing, mounting and the creation of mock-ups.

In addition to the computer and software, students will properly handle and use drawing tablets, digital cameras, scanners, and other various output devices such as printers and backup storage disks applicable to projects.

Students will be required to demonstrate ability in all educational projects and assignments and test with a minimum of 65% proficiency.

II. Course Outline and Objectives

UNIT 1: DESIGN FUNDAMENTALS (9.1.12.A,2; 1.3.12.D.3)

Students will:

1. develop a general knowledge of the history of Graphic Design
2. identify different industries and career paths for Graphic Design
3. learn best practices for a digital workflow
4. understand how to properly navigate an OS (Operating System) for increased efficiency when working on projects
5. identify skills needed for success in various areas of Graphic Design
6. practice concepting through the use of thumbnail sketches
7. understand image and type relationships

UNIT 2: SHOP SAFETY (9.2.12.F.2,4)

Students will:

1. identify and handle the tools of the trade in an accurate and safe manner
1. demonstrate safety when handling tools such as razor blades, X-Acto and mat knives
2. utilize all tools of the trade with various projects and jobs
3. identify replacement costs of tools of the trade, respecting them with proper care and storage for future use
4. clean tools with appropriate cleaning products and keep sink and all areas clean at all times
5. identify proper usage of adhesives and use them in a safe manner
6. understand procedures of shop safety and first aid
7. complete each project following all required criteria as given in job or project description
8. understand why following dimensions and specific instruction in job descriptions are vital for successful completion
9. use appropriate equipment and tools in a safe, proper manner within the assigned job or project deadline
10. demonstrate appropriate use of light table for elements in design
11. understand purpose of overhead projectors for large format projects
12. use proportional scale for figuring proper enlargement/reduction values
13. operate the Xerox printers/copiers safely for enlarging/reducing, scanning and duplicating, using appropriate modes and paper
14. operate and maintain computers and all peripherals (digital camera, scanner, printers)

UNIT 3: FOUNDATIONS OF DESIGN (9.1.12.B.3; 1.3.12.D.4)

Section 1: Principles of Design – Level 1

Students will:

1. be introduced to the characteristics of basic design elements such as: line, shape, volume, space, value, texture, color, scale/proportion, unity, contrast, repetition/variation, and rhythm
2. learn the effective use of negative and positive space within design elements and layout
3. understand why design is utilitarian

Section 2: Design and Layout – Level 1

Students will:

1. learn the basics of effective layout composition
2. effectively utilize design principals in their design solutions
3. understand the process of design from development through comprehensives
4. execute design solutions through traditional methods and through digital print media applications
5. be introduced to using grids as a means to organizing content
6. understand how functional design leads the viewer's eye

Section 3: Basic Color – Level 1

Students will:

1. learn the basic color wheel
2. understand primary, secondary and tertiary colors
3. understand the difference between warm and cool colors
4. understand tints, shades and tones
5. be introduced to basic color harmonies based on the color wheel
6. understand how to select complementary, analogous, triadic, split complementary, tetradic and square color schemes
7. learn the differences between RGB, CMYK and spot colors and how to properly utilize each for specific projects and media
8. utilize Color as a functional design element of perception and visual communication

Section 4: Typography – Level 1

Students will:

1. be introduced to the history of letterforms and the functions of typography
2. learn about the anatomy of type
3. understand the differences between type classifications, typestyles and type families
4. examine the construction and aesthetic application of typographic text
5. understand the use of typography as an essential element of design
6. appropriately and effectively use, treatment and application of type in a variety of formats
7. learn to modify and customize type for specific project needs

UNIT 4: TECHNOLOGY FOUNDATIONS (9.1.12.B.3; 1.3.12.D.4)

Section 1: Technology Skills

Students will:

1. identify and use computer and peripherals used in Graphic Design
2. be proficient in software applications used in a typical Graphic Design environment
3. understand how to open, close and manage fonts utilizing a font manager for various projects
4. utilize the scanner to properly digitize custom illustrations, textures and photography
5. learn how to properly adjust a digital camera for taking photos in various environments
6. understand the costs of all hardware, peripherals and software used in the Graphic Design field
7. properly create files and save them in the appropriate folders and/or storage disks
8. name files according to project name for easy retrieval
9. understand the importance of frequent saving and backing up of files
10. maintain computers and peripherals, shutting down and storing appropriately
11. utilize the internet to assist in subject matter research, understanding copyright laws
12. utilize online tutorials and educational tools
13. understand how to use the computer to save, resize and properly print reference
14. understand how to use spell-check and the importance of perfect spelling and punctuation in projects

15. understand the need for proofing, revisions and acquiring a sign off/approval from the client
16. utilize printer/copier to further enlarge, resize and alter reference images
17. practice proper composite output using the appropriate devices
18. complete all projects following all criteria within deadline assigned

Section 2: Vector-Based Software (Adobe Illustrator) Level 1 (9.1.12B.3; 1.3.12.D.4)

Students will:

1. learn key Illustrator concepts
2. create Illustrator documents for various projects
3. utilize keyboard commands to maximize productivity
4. understand the Illustrator interface (menus, palettes)
5. practice basic drawing technique with the pen, brush and objects tools
6. practice basic path editing
7. practice basic text editing
8. understand how to make selections
9. understand Appearances and how to edit them
10. work with Groups and Layers to keep drawings organized
11. understand how to work with color
12. practice object transformation and positioning
13. understand how to work with images
14. learn how to save and print their projects
15. Represent proper use of color, tint, opacity and stroke thickness
16. use guides for proper alignment in designs
17. save in appropriate format upon request and understand purpose of file formats (AI, EPS, PDF, etc)
18. resize artwork in layouts in proportion using correct tools and keys

Section 3: Pixel-Based Software (Adobe Photoshop) Level 1 (9.1.12B.3; 1.3.12.D.4)

Students will:

1. learn the Photoshop interface and setup custom work spaces
2. learn how to effectively use Bridge for quickly finding and viewing images
3. be introduced to the basics of setting up documents, saving files in different formats and customizing Preferences
4. learn keyboard shortcuts to streamline workflow
5. make selections via quick selection tools or quick mask mode
6. create accurate paths with the Pen tool
7. be introduced to the basics of Layers and Adjustment Layers
8. learn to crop, transform and straighten images
9. use Adjustment layers and the Adjustment panel
10. adjust tones with Levels
11. limit adjustments with Layer Masks
12. adjust images with Hue/Saturation
13. learn to remove a color cast

14. adjust images with the Black & White adjustment layer
15. learn to paint with brushes and gradients
16. learn how to Warp text
17. learn Special Effects such as adding Layer Styles and Smart Filters
18. combine group photos
19. learn how to output a file by selecting the appropriate print settings for individual projects
20. save in appropriate format upon request and understand purpose of file formats (PSD, JPEG, EPS, GIF, PNG, RAW, PDF, etc)

Section 4: Page Layout Software (Adobe InDesign) Level 1 (9.1.12B.3; 1.3.12.D.4)

Students will:

1. understand how to create a Workspace and save custom Workspaces
2. identify menu items, tools, palettes and menus and how to use them
3. utilize keyboard commands to maximize productivity
4. learn to navigate a multi-page document
5. learn to set rulers, guides and measurements and view options
6. use guides for proper alignment in designs
7. use Contextual Menus and how to customize them
8. learn how to create new documents
9. set margin and column guides
10. learn how to insert, delete, and move pages
11. add sections and page numbers
12. import text and auto-flow text
13. use text on a path
14. spellcheck a document
15. import graphics from various formats and understand how to use the Links panel
16. turn image layers on and off
17. learn how to select objects
18. use basic strokes and fills
19. use the Eyedropper tool
20. understand grouping and locking objects
21. learn to align and distribute objects
22. duplicate, scale, mirror and rotate objects
23. apply basic character styling
24. understand paragraph formatting
25. apply character, paragraph and object styles
26. create a table with rows and columns
27. learn how to add, delete and adjust rows and columns
28. create color swatches
29. use gradient swatches and apply gradients
30. export files to different formats such as PDF, JPEG and TIF
31. understand the print dialogue box
32. export printer ready PDF files (with crop marks, registration marks and properly set colors for separation)

33. show proficiency in how to place and properly scale and rotate images
34. utilize columns for text for readability, using text wrap with images if appropriate
35. understand page layout and printer spreads

UNIT 5: PRODUCTION & FINISHING SKILLS

Students will:

1. understand how to setup document bleeds
2. understand crop marks, registration marks, color bars and page information
3. know how to trim printed pieces utilizing the X-Acto knife and straight edge
4. know to size and trim a presentation board
5. know how to mount printed pieces on board using eco-friendly adhesives
6. know how to clean their finished pieces with a kneaded eraser
7. understand how to setup and fold multi-page pieces

III. Textbooks, Instructional Materials and Software

Technology:

- PC based environment with Adobe Creative Suite, latest version (Photoshop, Illustrator, InDesign)
- Computer projector with wall mounted screen for teacher instruction
- Smart board for interactive instruction
- Microsoft Internet Explorer
- Microsoft Office 2010 (Word, PowerPoint)
- Wacom Intuos 3 and 4 drawing tablets
- Wacom Cintiq digital drawing display
- Digital cameras
- Black & White and color copiers
- Wide format printers
- HP and Epson scanners
- Laser printers

Tools of the trade:

- Rulers, T-squares & triangles
- Sketch pads
- Various paper stocks
- Prismacolor colored pencils
- Prismacolor markers
- X-Acto and mat knives
- Lucite roller
- Rubber cement, tape, StudioTac adhesive
- Paper cutter
- Light tables

IV. Instructional Strategies

Various teaching methods will be used during the course. Handouts and discussion will be used, however, most of the instruction of this course will be a hands on instruction, in groups and individually. Live demonstrations will be made by the instructor then repeated and practiced by the students with one-on-one interaction to check for understanding. Real-time lessons will take place in a large group with the teacher on the computer using the projector or Smart Board, students working on their own computers with the teacher. Individual proofing and consulting will take place after demonstrations take place and art projects begin. Group critiques and individual evaluation will take place upon completion of art projects.

During the course of the year students will be given the opportunity to review design books and magazines, review websites for potential ideas for new projects and potentially meet people from industry and take field trips.

V. Evaluation

Students are evaluated using the following criteria:

1. Class participation (examples include attendance, completion of daily duties, general behavior towards classmates and instructor, sharing and maintenance of equipment and tools)
2. Research and design maintenance (examples include maintenance of all notes, project stages, file backups)
3. Composite presentation
4. Accuracy in meeting project criteria
5. Quizzes and tests
6. Meeting deadlines (deductions apply to all late projects)
7. Portfolio maintenance

VI. **Scope and Sequence Chart** *KEY I = Introduced D = Developed R = Reinforced*

SKILLS TO BE LEARNED	9	10	11	12
Handle tools of the trade and equipment correctly and safely (9.2.12.F.1,2,4,5)	IDR	IDR	IDR	IDR
Demonstrate knowledge of digital file organization and archiving (9.1.12.B.3,4)	ID	R	R	R
Demonstrate a professional work ethic (9.1.12.B.3,4)	I		DR	DR
Use effective time management skills in the production of projects (9.1.12.B.3)	ID		DR	R
Demonstrate craftsmanship (organization, neatness, precision) (9.1.12.B.3,4)	ID	IDR	IDR	IDR
Understand and practice the characteristics of basic design principles (9.1.12.B.3)	I	R	R	R
Understand the creative process and importance of each step (9.1.12.B.2,4; 9.2.12.D.1)	I	D	IDR	IDR
Apply appropriate software solutions to design problems (9.1.12.B.3,4)	I	D	DR	R
Articulate and solve basic problems of form and function (9.1.12.B.3,4)	I	D	DR	DR
Identify and apply the critical thinking process to design challenges (9.1.12.B.3,4)	I	DR	DR	DR
Cut accurately using an X-Acto knife and mat knife in a safe manner (9.2.12.F.2)	ID	IDR	IDR	IDR
Understand the value of all tools, equipment, and supplies (9.2.12.E.1)	I	ID	IDR	IDR
Demonstrate tool skills through a variety of creative art projects (9.2.12.F.4; 9.2.12.B.3; 1.4.12.B.3)	I	D	R	R
Demonstrate correct use of appropriate adhesives, and chemicals (9.2.12.F.4)	IDR	IDR	IDR	IDR
Demonstrate proper inventory and storage of supplies (9.2.12.F.5)	ID	ID	R	R
Read and measure accurately with a standard American ruler (9.2.12.B.2)	I	R	R	R
Demonstrate knowledge of alignment, balance, proportion and use of positive and negative space (1.4.12.B.2)	I	ID		IDR
Demonstrate knowledge of color (primary, secondary, tertiary, complimentary) (1.4.12.B.2)	I	D		IDR
Demonstrate knowledge of working in mixed media. (1.3.12.D.2)	I	ID		IDR
Create vector illustrations to be used in design layouts (1.4.12.B.3; 1.1.12.D.2)	I	ID	ID	IDR
Utilize work area in a clean organized manner. (9.1.12.B.4)	IDR	IDR	IDR	IDR
Demonstrate an awareness of art history and how it relates to design and media (1.2.12.A.1,2)	I	D		IDR
Understand the creative process and importance of each step (9.1.12.B.3)	I	D		IDR
Understand of the importance of meeting a deadline (9.1.12.B.3,4; 9.2.12.D.1)	IDR	IDR	IDR	IDR
Demonstrate knowledge of documentation of design time and understanding commercial worth of the profession (9.1.12.B.3,4)		I	ID	IDR

Prepare thumbnails, roughs, and comps (9.1.12.B.2,4)	I	IDR	DR	IDR
Demonstrate knowledge of typography, font styles, point size & layout purposes (9.1.12.B.3)	I	ID	IDR	IDR
Create and understand purpose of logo(s) to brought through on other projects. Ex. Stationary, ad, package, etc. (9.1.12.B.3; 1.3.12.D.4)		I	ID	IDR
Demonstrate knowledge of package design (1.3.12.D.1,4)				IDR
Demonstrate knowledge of basic elements of operation of computers, printers, scanners, and other peripherals such as drawing tablets (9.1.12.B.3)	IDR	IDR	IDR	IDR
Demonstrate knowledge of appropriately enlarging and reducing art with copying and printing (9.1.12.B.3)	ID	IDR	IDR	IDR
Demonstrate knowledge of the differences between vector based and pixel based artwork and the appropriate use for each (9.1.12.B.3; 1.3.12.D.4)	I	D	IDR	IDR
Demonstrate proficiency in Adobe Illustrator including tools, palettes, options and production formats (9.1.12.B.3; 1.3.12.D.4)	I	DR	IDR	IDR
Demonstrate proficiency in Adobe Photoshop including tools, palettes, options and production formats (9.1.12.B.3; 1.3.12.D.4)	I	DR	IDR	IDR
Demonstrate proficiency in Adobe InDesign including tools, palettes, options and production formats (9.1.12.B.3; 1.3.12.D.4)	I	DR	IDR	IDR
Demonstrate proficiency in Using drawing tablets for illustration and digital image composition (9.1.12.B.3; 1.3.12.D.4)	I	D		IDR
Demonstrate proficiency in using digital cameras for artwork, layout, and composition in various lighting conditions (9.1.12.B.2)	I	ID		IDR
Understand print versus web resolution (9.1.12.B.2)	I	IDR	IDR	IDR
Understand difference between RGB, spot color, and CMYK (9.1.12.B.2)	I	IDR	IDR	IDR
Demonstrate knowledge and purpose of copyrighted images, Royalty Free images, the Fair Use Act and their rights and/or limitations (9.1.12.B.2)		I	R	IDR
Mount & Mat artwork in a professional manner (9.1.12.F.4)		I	ID	IDR
Demonstrate knowledge of setting up research reference files (9.1.12.B.3,4)	I	ID		IDR
Demonstrate knowledge of the cost of tools of the industry (9.2.12.E.1)	I	I	DR	DR
Create and revise of a resume for employment (9.1.12.A.4)	I			IDR
Demonstrate knowledge of the many career opportunities related to graphic design (9.1.12.A,2; 1.3.12.D.3)	I	ID	IDR	IDR
Apply knowledge gained through research of trends & styles into design projects (9.1.12.A.4)	I	ID	R	R
Integrate design concepts with materials, skills, and technology (9.1.12.B.3)	I	ID	R	R
Develop ability to critique, defend, & support the integrity of a chosen project (9.1.12.A.4)		ID	R	R
Relate printing terms, concepts, & processes to the prep of digital documents (9.1.12.A.4)		I	ID	IDR
Assess personal strengths and weaknesses (9.1.12.B.3)		I	D	R
Assemble a final portfolio with a variety of design projects (9.1.12.B.3)		I		DR
Present art portfolio in a professional manner (9.1.12.A.4)			ID	IDR

VIII. Student Handout – Graphic Arts 1

Students will be introduced to Graphic Design and work in an environment that emulates a real-world design studio. This course will focus on building foundations in design and adapting them for the many platforms and devices in which digital content is delivered.

Graphic Arts students are taught about design, layout, typography and color theory. Students learn in a hands-on environment, using industry-related technology and software.

A focus on concept development and problem solving is emphasized and encouraged. This is done through thumbnails sketches, intermediate rough layouts and final comprehensives. The process is repeated for each project for retention and best practices.

Once students have learned the design process, the execution of concepts with the use of technology is emphasized. Students are taught to pay attention to the minute details that are essential to properly finishing a project. Creative and technical skills are necessary to complete projects successfully.

PROFICIENCIES:

Students will:

1. Handle tools of the trade and equipment correctly and safely
2. Demonstrate knowledge of digital file organization and archiving
3. Demonstrate a professional work ethic
4. Use effective time management skills in the production of projects
5. Demonstrate craftsmanship (organization, neatness, precision)
6. Understand and practice the characteristics of basic design principles
7. Understand the creative process and importance of each step
8. Apply appropriate software solutions to design problems
9. Articulate and solve basic problems of form and function
10. Identify and apply the critical thinking process to design challenges
11. Cut accurately using an X-Acto knife and mat knife in a safe manner
12. Understand the value of all tools, equipment, and supplies
13. Demonstrate tool skills through a variety of creative art projects
14. Demonstrate correct use of appropriate adhesives, and chemicals
15. Demonstrate proper inventory and storage of supplies
16. Read and measure accurately with a standard American ruler
17. Demonstrate knowledge of alignment, balance, proportion and use of positive and negative space
18. Demonstrate knowledge of color (primary, secondary, tertiary, complimentary)
19. Demonstrate knowledge of working in mixed media
20. Create vector illustrations to be used in design layouts
21. Utilize work area in a clean organized manner
22. Demonstrate an awareness of art history and how it relates to design and media
23. Understand the creative process and importance of each step
24. Understand of the importance of meeting a deadline
25. Prepare thumbnails, roughs, and comps

26. Demonstrate knowledge of typography, font styles, point size & layout purposes
27. Demonstrate knowledge of basic elements of operation of computers, printers, scanners, and other peripherals such as drawing tablets
28. Demonstrate knowledge of appropriately enlarging and reducing art with copying and printing
29. Demonstrate knowledge of the differences between vector based and pixel based artwork and the appropriate use for each
30. Demonstrate proficiency in Adobe Illustrator including tools, palettes, options and production formats
31. Demonstrate proficiency in Adobe Photoshop including tools, palettes, options and production formats
32. Demonstrate proficiency in Adobe InDesign including tools, palettes, options and production formats
33. Demonstrate proficiency in Using drawing tablets for illustration and digital image composition
34. Demonstrate proficiency in using digital cameras for artwork, layout, and composition in various lighting conditions
35. Understand print versus web resolution
36. Understand difference between RGB, spot color, and CMYK
37. Demonstrate knowledge of setting up research reference files
38. Demonstrate knowledge of the cost of tools of the industry
39. Create and revise of a resume for employment
40. Demonstrate knowledge of the many career opportunities related to graphic design
41. Apply knowledge gained through research of trends & styles into design projects
42. Integrate design concepts with materials, skills, and technology
